Description

The Posh 6.5 OS Mini is a cost effective way to gain exceptional sound quality from an attractive, non obtrusive hanging structure ceiling speaker. The 6.5 OS Mini comes with all necessary UL Listed mounting hardware. The coaxial design offers smooth even coverage for even the most demanding applications. The high performance woofer and tweeter are an ideal combination for both foreground and background music as well as clear, intelligible voice paging.

The rugged but attractive cylindrical enclosure creates the perfect sonic environment for consistent predictable performance in all applications.

The single point mounting system makes it a snap to mount from any open to structure environment. If you have a particularly choosy customer, the Mini OS can be custom painted to match any décor. This model comes standard with a 15 watt, extended range transformer, but can be customized at the factory with either a 10 or 30 watt extended range transformer. The economical Posh 6.5 Mini OS is the perfect cost Effective solution to your next open to structure job.
